

TutorBin

This is a complete project in itself in which I used Django Framework with pillow an image processing library

Zip file contains:

1. assignment code.
2. some screenshot
3. how to run pdf
4. requirement file
5. readme file

How To Run :

1. download the zip file.
2. unzip the zip file.
3. open your terminal
`cd tutorbin`
4. install virtual environment
 - `python -m venv venv`
5. activate virtual environment
`venv\scripts\activate (window)`
`source venv/bin/activate (Linux)`
6. Install Django packages used in this project
`pip install -r requirements.txt`
7. perform makemigrations and migrate
`python manage.py makemigrations`
`python manage.py migrate`
8. Run the Django Server
`python manage.py run server`
9. open <https://localhost:8000> in your chrome

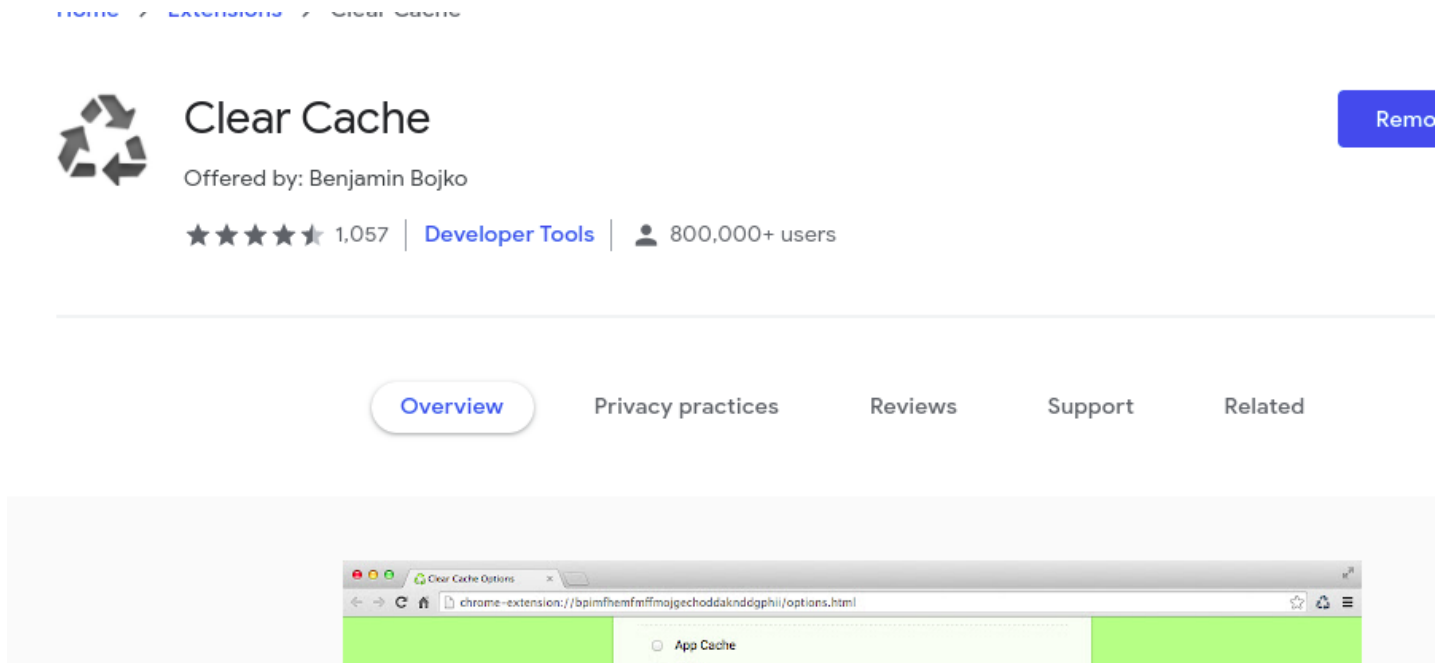

The issue in Code :

normally website cache stored in the browser and it renders again and again unless we clear our cache that's why the previous image show on the screen due to cache and it seems it is not rotated

how can Resolved Issue :

1. clear your browser cache if the image seems not rotating

2. download clear cache chrome extension it will help you lot

Note:- from my side everything is perfect and tested much time but it is also possible some error and bug can be found IN CASE please contact me AT dbHAML7@GMAIL.COM
